

Team 3

Authors: Laurenz Luke Gonzales, Ed Salinas

Home Page Name: index.html

DID NOT DO / NOT IMPLEMENTED:

- 1 REPORT (Total Salaries Report)
- Team Report does not have a location sort

BUGS:

- INSERT INTO SELECT does not insert data into SALARY table (submitemployeeessalarychanges.php)
- When starting to go back and see if my other implementations were okay, editing the employee's position and location drop-down menu stopped working properly. -> I think I fixed it, but I do not know if this bug will occur again.

Changes to Tables:

EMPLOYEE:

- Salary NOT NULL -> NULL
- Hire_Date NOT NULL -> NULL
- Probation_Status NOT NULL -> NULL
- Manager_ID NOT NULL -> NULL

NEW TABLE:

```
CREATE TABLE SALARY (  
    Employee_ID INT UNSIGNED NOT NULL,  
    Year year NOT NULL,  
    Employee_Salary INT UNSIGNED NOT NULL,  
    FOREIGN KEY (Employee_ID) REFERENCES EMPLOYEES (Employee_ID)  
);
```

Assumptions:

- When there is a new employee, managers are to input their hire date
- When there is a new employee, managers are to input their manager ID
- Managers are only able to see the employees they oversee
- HR Employees are the only ones able to edit/enter probation status for each employee
- HR Employees are the only ones able to edit/enter raise and salary
- HR Employees are the only ones to be able to edit and access employee performance review

IMPORTANT INFORMATION

- Laurenz Luke Gonzales created 95-99% of all the pages within this project
- Ed Salinas contributed heavily in the table implementations
- Taylor Rodgers and Kobi Fon-Ndikum did not contribute at all to this project
